PRELIMINARY AMENDMENT

The applicant filed a patent application for the above-referenced invention as application serial no. 10/049,744 on May 16, 2002. The United States Patent and Trademark office "finally" rejected the application in an Office Action dated February 9, 2005. This Preliminary Amendment is a component of a Request for Continuing Examination of this application and responds to the specific arguments made by the USPTO in that "final" Office Action.
